

Chips, scratches, chunks of missing laminate, corner guards, ugly black lines - a day at the mall is not a pretty sight! Korlux™ flexible stone-filled veneers are the solution. Virtually chip and crack-proof, Korlux™ veneers contain pigmented stone particles distributed through and through so there are no black lines at the corners and edges. Seams (and scratches) are nearly invisible. Best of all, Korlux™ veneers can be renewed with a Scotch-Brite™ pad or light sanding. With Korlux™, the merchandise is what you'll notice.
